

Questionnaire for Telehealth appointment

Please review all questions below and record or discuss via live chat on the healthchat app.

Attention Deficit Disorder (ADD)

- Are your symptoms improved on your current medication regimen?
 - Please describe in detail how your symptoms have improved
Include examples (ie: how you are able to complete tasks, focus on details)
- Please explain how the medication has improved your life
 - Are you doing better at work?
 - How has this medicine improved your relationships with friends, family and colleagues?
- Are you having any side effects with the medications?
 - The most common side effects include
 - Insomnia
 - Anxiety
 - Weight loss
 - Emotional changes (sadness etc...)
 - Racing heart or palpitations
- What other medications have you been on for ADD and why is this current dose and treatment working best?
- Do you want to continue the medication?
- Please confirm you understand the potential side effects
